Background:

Rulemaking 19-09-009 facilitates the commercialization and deployment of microgrids while prioritizing system, public, and worker safety and avoiding shifting costs between ratepayers. On September 12, 2019, the Commission initiated this Rulemaking to design a framework surrounding the commercialization of microgrids associated with Senate Bill (SB) 1339 (Stern, 2018), as well as to account for the Commission’s commitment toward utilizing additional technologies and activities that may be useful for achieving overall resiliency goals.

As part of the rulemaking, the CPUC organized a working group to facilitate thoughtful and informed discussions to continue to support the goal of resiliency and the commercialization of microgrids. Specifically, the RMWG will further explore issues not previously addressed or under current consideration by the Commission. The topics may be subject to change and reprioritization

as the discussions evolve over the course of the working group meetings.

Purpose of the Meeting:

- Value of Resiliency – Staff and the Working Group will look more closely at Pillar 4: Resiliency Response Assessment of the 4 Pillar Methodology. Also presenting will be Paul Cummings, Program Manager for Nevada County Office of Emergency Services discussing Nevada County resilience planning from the local government perspective. Working group members will have the opportunity to provide constructive feedback and input to staff.
