#### Background:

Rulemaking 19-09-009 facilitates the commercialization and deployment of microgrids while prioritizing system, public, and worker safety and avoiding shifting costs between ratepayers. On September 12, 2019, the Commission initiated this Rulemaking to design a framework surrounding the commercialization of microgrids associated with Senate Bill (SB) 1339 (Stern, 2018), as well as to account for the Commission’s commitment toward utilizing additional technologies and activities that may be useful for achieving overall resiliency goals.

As part of the rulemaking, the CPUC organized a working group to facilitate thoughtful and informed discussions to continue to support the goal of resiliency and the commercialization of microgrids. Specifically, the RMWG will further explore issues not previously addressed or under current consideration by the Commission. The topics may be subject to change and reprioritization as the discussions evolve over the course of the working group meetings.

## **Purpose of the Meeting:**

- Value of Resiliency: Tribal Resiliency Perspectives
  - Will Micklin of the Ewiiapaayp Band of Kumeyaay Indians in Alpine, CA and Josh Simmons, Tribal Energy and Climate Consultant with Prosper Sustainably, leading the California Tribal Gap Analysis project will present on Tribal resiliency planning perspectives and experiences. Working group members will have the opportunity to provide constructive feedback and input to staff.
