

**Settlement Year 7 – Second Quarter
Progress Report to California Public Utilities Commission
Electric Vehicle Charging Station Project**

*For the period March 6, 2018 through June 5, 2019 (the Reporting Period)
Submitted July 5, 2019 by NRG Energy, Inc. on behalf of the Dynegy Parties¹*

EXECUTIVE SUMMARY

NRG and EVgo continue to implement the 2012 settlement agreement (Settlement) between the California Public Utilities Commission (CPUC) and certain NRG-affiliated entities to deploy electric vehicle charging infrastructure across the state. While NRG remains the obligated party, EVgo is executing the implementation of the Settlement as a service provider. The program has spurred a growing EV ecosystem that would not have been possible without this partnership.

As of the Reporting Date, July 5, 2019, EVgo and NRG have installed² 244 of 250 sites. Including the 6 sites remaining in construction³, EVgo will have added 161 DC fast chargers (DCFC) under the Settlement since December 5, 2018. Within the amended Settlement budget, EVgo and NRG team will exceed the target number of DCFC sites by 30, or 14%, the target number of DCFC chargers by 303, or 114%, and the Make Ready stubs by 34, or 0.5%.

Across all programs, a total of 562 DCFC will be installed under the Settlement, more than twice the originally specified 259 DCFC due to cost efficiencies. After delivering substantial progress over the past six months moving dozens of sites through construction, over the next several weeks, NRG and EVgo expect to finish installations that have complex interdependencies with utility interconnections, other commercial development activities, as well as schedule final inspections based on availability by the relevant Authorities Having Jurisdiction (AHJ).

The table below demonstrates the number of sites and chargers that have completed construction and received final electrical inspection as of the reporting date. Since 5 of the 6 remaining sites are the larger High-Power sites, 98% of sites have hit the electrical final inspection milestone representing 95% of DCFC. Only 3 of 6909 Make Ready sites representing 30 make ready stubs remain waiting for final electrical inspection.

As of 7/5 Program	Compliance Sites	Total		INSTALLATIONS				% Installed	
		Sites	Chargers	Completed		Remaining		Sites	Chargers
				Sites	Chargers	Sites	Chargers		
Freedom Station	200	218	419	217	417	1	2	100%	100%
High Power	10	22	102	17	75	5	27	77%	74%
EVOpp	8	8	30	8	30	0	0	100%	100%
Make Ready	6875	795	6909	792	6879	3	30	100%	100%
Tech Demo	2	2	11	2	11	0	0	100%	100%
Total*	220	250	562	244	533	6	29	98%	95%

* This only covers DCFC - Make Ready are not incorporated in the total

¹ Capitalized terms not otherwise defined herein shall have the meaning ascribed to such terms in the Long-Term Contract Settlement Agreement (the “Agreement”).

² Indicates chargers installed with final electrical inspection.

³ All sites under construction have equipment delivered and staged (2 sites) or installed (4 sites).

In addition to these sites remaining to receive final electrical inspection, another 7 sites representing 31 DCFC await a final building inspection. These sites have a combination of construction, utility construction and interconnection, or in some cases host commercial development schedules which have extended the receipt of the final building inspection.

The table below demonstrates the number of sites and chargers that have received building final inspections as of the reporting date. This includes 9 sites and 35 DCFC which received building final inspections since the reporting period date of June 5, 2019.

As of 7/5	INSPECTIONS								
	Compliance	Total		Completed		Remaining		% Remaining	
		Sites	Sites	Chargers	Sites	Chargers	Sites	Chargers	Sites
Freedom Station	200	218	419	216	415	2	4	1%	1%
High Power	10	22	102	12	50	10	52	45%	51%
EVOpp	8	8	30	7	26	1	4	13%	13%
Make Ready	6875	795	6909	792	6879	3	30	0.4%	0.4%
Tech Demo	2	2	11	2	11	0	0	0%	0%
Total*	220	250	562	237	502	13	60	5%	11%

* This only covers DCFC - Make Ready are not incorporated in the total

With respect to the Freedom Station build, as of the Reporting Date, EVgo and NRG have installed with final inspection a total of 216 of 218 sites. Also, as of the Reporting Date, EVgo has fulfilled the low-income PUMA targets of 20% by region. Upon completion of all 218 sites, which will occur shortly, EVgo will have fulfilled all regional targets, and installed 18 sites beyond the original compliance target.

With respect to the High-Power Charging Plazas (HPC Plazas) build, as of the Reporting Date, EVgo and NRG have installed a total of 17 of 22 HPC Plazas, well beyond the compliance minimum of 10 HPC Plaza sites. Upon completion of the 22 HPC Plazas, which comprise 102 DCFC, EVgo will deliver more than double the number of sites and more than three times the number of DCFC originally contemplated under the Settlement, as amended. Since December 5, 2019, EVgo has installed 13 HPC Plazas in a 6-month span and commenced construction on a further 5 HPC Plazas. Additionally, with 5 HPC Plaza sites located in low income PUMAs, EVgo will exceed the 20% target.

With respect to the Make-Ready build, as of the Reporting Date, EVgo and NRG completed 6,879 Make-Ready Stubs at 792 sites. Also, as of the Reporting Date, a total of 30 additional stubs at 3 sites are under construction. As of June 5, 2019, EVgo has exceeded the compliance target of 6,875 Make-Ready Stubs and satisfied regional targets and public interest and workplace stub counts set forth in the Settlement.

With respect to the EV Opportunity build, EVgo and NRG have installed a total of 8 sites. These sites will serve communities with the highest pollution burden and support EV carsharing and ridesharing services, such as Green Raiteros, the electrified rural ridesharing program serving California's Central Valley.

The Technology Demonstration projects are in their final stages of research and reporting. Specific updates for Technology and Opportunity Projects are provided in the corresponding section below.

In the quarter ending June 5, 2019, EVgo customers completed more than 300,000 fast-charging sessions at Freedom Station sites, which dispensed over 4,463,000 kilowatt-hours of electricity. This translates to 14.47 million miles driven on electricity in this quarter, displacing 695,609 gallons of gasoline⁴ and 3,285 MT of CO2 avoided.

INSTALLATION OF PUBLIC EV CHARGING STATIONS (FREEDOM STATIONS)

As of the Reporting Date, July 5, 2019, a total of 218 sites were either complete or under construction, marking the fulfillment of all regional targets, low-income PUMA targets of 20% by region, and including an incremental 18 sites beyond the original compliance target set forth in the Settlement. Since December 5, 2019, EVgo has installed 14 Freedom stations in a 6-month span.

As the Reporting Date, July 5, 2019, EVgo has received final inspections on all but 2 sites; these remaining sites are projected to be complete and operational by the end of July 2019.

The table below summarizes Freedom Station progress throughout the term of the Settlement. Completed sites have received both the electrical and building inspection from the local AHJ.

<i>DC Fast Charging Station Progress</i>	Year-End 2013	Year-End 2014	Year-End 2015	Year-End 2016	Year-End 2017	Year-End 2018	2019	2019	Report Date 7/5
							Q1	Q2	
Sites under Construction	5	16	11	8	0	5	8	1	1
Sites Pending Final Building Inspection	-	-	-	-	-	-	-	4	2
Sites Completed	10	56	105	161	200	204	206	214	216
Completed Sites w/ SAE Combo (CCS)		23	105	161	200	204	206	214	216
Completed sites with credit card readers and SAE combo (CCS)		2	105	161	200	204	206	211	211
Cumulative Settlement Target	40	100	160	200	200	204	206	218	218

Completed Freedom Stations as of the Reporting Date are listed in Appendix A.

⁴ 3.125 mi/kWh derived by AFDC from sales weighted average of 2016 model year vehicles with sales in 2015: 2015 sales from "U.S. Plug-in Electric Vehicle Sales by Model" (<http://www.afdc.energy.gov/data/vehicles.html>); MPGs based on 24.3 MPG CAFÉ Standard (http://www.afdc.energy.gov/vehicles/electric_emissions_sources.html).

Station Distribution

The table below summarizes the geographic distribution requirements and progress on completed stations as of June 5, 2019, as well as the projected final station count by geographic distribution.

<i>Geography</i>	Required	Complete- 6/5	Percentage	Projected Final	Percentage
LA Basin	110	107	97%	110	100%
SF Bay Area	55	69	125%	69	125%
San Joaquin Valley	15	15	100%	15	100%
San Diego County	20	20	100%	21	105%
Other PG&E Counties	-	3	-	3	-
Total:	200	214	107%	218	109%

Low-Income PUMA Distribution

As of June 5, 2019, EVgo had finished the installation and received the final inspections on all low-income PUMA Freedom Stations. Of the completed low-income Freedom Stations, all but two are energized as of the Reporting Date, July 5, 2019.

The table below summarizes the low-income PUMA distribution and progress as of the Reporting Date.

<i>Geography</i>	Minimum Build Obligation	PUMA Minimum Requirement	Actual PUMA Sites	PUMA %
LA Basin	110	22	22	100%
SF Bay Area	55	11	15	136%
San Joaquin Valley	15	3	4	133%
San Diego County	20	4	5	125%
Other Counties	-	-	-	-
CA- all	200	40	46	115%

In delivering a “Savings Event”, the Settlement dictates that EVgo uphold the target of 20% of Freedom Stations located in low-income PUMAs. EVgo has delivered against this metric, calculated below.

<i>Geography</i>	Projected Final	Actual PUMA Sites	PUMA %
LA Basin	110	22	20%
SF Bay Area	69	15	22%
San Joaquin Valley	15	4	27%
San Diego County	21	5	24%
Other Counties	3	-	-
CA- all	218	46	21%

While not a requirement of the Settlement, at the request of the CPUC, EVgo has compared its Freedom Station installations against the CalEnviroScreen tool, which was not available at the time of the Settlement; this tool is a screening methodology that can be used to help identify California communities that are disproportionately burdened by multiple sources of pollution. Disadvantaged communities are defined as the top 25% scoring areas from CalEnviroScreen.

Compared to CalEnviroScreen 2.0, EVgo has located 43 out of 218, or 20% of Freedom Stations in disadvantaged communities. Compared to the most updated version of CalEnviroScreen, Version 3.0, EVgo has located 47 out of 218, or 22% of Freedom Stations in disadvantaged communities.

Compared to AB 1550, which defines low-income communities as census tracts with median household incomes at or below 80% of the statewide median income or with median household incomes at or below the threshold designated as low-income by HCD's State Income Limits, EVgo has located 88 out of 218, or 40% of Freedom Stations in low-income communities.

INSTALLATION OF HIGH-POWER CHARGING PLAZAS (HPC PLAZAS)

As part of the Second Amendment to the Settlement, NRG and EVgo are committed to building ten (10) or more HPC Plazas to serve the charging needs of residents of multi-family housing. These HPC Plazas will meet the following criteria:

- At least three (3) 50kW (or higher) DC Fast Chargers;
- Located in the top 50% of California Public Use Microdata Areas (PUMAs) ranked by percentage of residents in multi-family housing;
- Distributed with a goal to serve drivers throughout the State of California, including in both Northern and Southern California; and
- 20% of stations installed in qualified low-income areas (by income-ranked PUMA)

As of the Reporting Date, 7/5/2019, EVgo has installed⁵ a total of 17 of 22 HPC Plazas. The remaining 5 HPC Plaza sites are projected to be complete with final building inspections by the end of August 2019.

Upon completion, EVgo and NRG will deliver 102 DCFC at those 22 HPC Plaza sites, which is double the number of sites and more than three times the number of DCFC originally considered.

As of the Reporting Date, 7/5/2019, EVgo has 12 HPC Plaza sites with final building inspections, of which 7 are energized and serving the public. Constructing EVSE as a part of a larger development, challenges building in parking structures and sites requiring substantial utility connections have all resulted in construction delays or delays of final building inspection.

The table on the following page summarizes HPC Plaza progress throughout the term of the Settlement. Completed HPC Plaza sites have received both the electrical and building inspection from the local AHJ.

⁵ Indicates chargers installed with final electrical inspection.

<i>DC Fast Charging HPC Plaza Progress</i>	Year- End 2018	2019	2019	Report Date 7/5
		Q1	Q2	
Sites under Construction	5	8	10	5
Sites Pending Final Building Inspection	0	0	4	5
Sites Completed	0	1	8	12
Completed sites with credit card readers and SAE combo (CCS)	0	1	4	8
Cumulative Settlement Target	10	22	22	22

Station Distribution

The table below summarizes the geographic distribution and progress on HPC Plazas as of the Reporting Date. While the Settlement as amended does not require specific minimums of sites across the state, the geographic distribution of HPC Plazas is intended to serve drivers and residents of multi-family housing throughout the State of California, including in both Northern and Southern California.

<i>Geography</i>	Requirement	Complete- as of 6/5	Projected Final Distribution
LA Basin	-	2	7
SF Bay Area	-	5	10
San Joaquin Valley	-	-	-
San Diego County	-	-	4
Other PG&E Counties	-	1	1
Total:	10	8	22

Completed HPC Plazas as of the Reporting Date are listed in [Appendix A](#). The remaining HPC Plazas are projected to finalize inspections over the coming weeks.

Low-Income PUMA Distribution

Five of the HPC Plaza sites under contract are located within a low-income PUMA.

OTHER

Credit Card Readers: While EVgo remains committed to the installation of credit card readers in the EV Charging Ecosystem installed under the Settlement, delays in hardware and software compatibility on a subset of EVSE has resulted in delayed deployment. EVgo has completed credit card retrofits on two-thirds of its required stations and under the projected timeline expects to finish those installations in July 2019. We do not expect this delay in implementation for new credit card readers to create any consumer experience issues; Fewer than 1% of EVgo charging sessions take place with a credit card. In the interim, subscribers and nonsubscribers can access single-use charging sessions in app, with an RFID card or through the customer service center – open 24-7-365.

INSTALLATION OF ENERGY STORAGE

As part of the Second Amendment to the Settlement, NRG and EVgo can spend up to \$2.5 million towards the procurement and installation of batteries and related storage equipment.

Under the Settlement, EVgo has completed or has in construction 12 battery storage systems located at 9 fast charging stations in California. EVgo has successfully installed second life battery systems at Union City and Baker, California, as part of the SSPEC project and has completed the installation of first-generation battery systems at 3 Freedom Stations. Another 3 sites with battery systems are currently in progress as part of the HPC Plazas under construction.

EVgo has built upon the work from the Stationary Storage Plus Electric Charging (SSPEC) technology demonstration project and sees a critical role for battery storage moving forward. However, one early lesson learned is that battery storage cannot be a substitute for rate reform. EVgo is encouraged by the efforts of California utilities to introduce new commercial rates more in line with the use case of DC fast charging.

INSTALLATION OF MAKE READY STUBS AND MAKE READY ARRAYS

Status of Make-Readies Sites

As of the Reporting Period, a total of 6,879 Make-Ready Stubs have been installed at 792 sites. This build exceeds the minimum requirement of 6,875 Make-Ready Stubs required by the Settlement. A further 30 stubs at 3 sites are under construction, as NRG and EVgo built in some buffer in the pipeline in order to make sure the Settlement obligations were met. Overall, EVgo has 795 Make-Ready Sites under contract as of the end of the Reporting Period, representing 6,909 Make-Ready Stubs.

The table below summarizes the geographic distribution and progress as of the Reporting Date. EVgo has satisfied the public interest and workplace and the regional distribution targets set forth in the Settlement.

<i>Geography</i>	% of stubs	Build Obligation	Completed	Remaining	Projected Final
LA Basin	55%	2,269	2,550	30	2,580
SF Bay Area	27.5%	1,134	2,543	-	2,543
San Joaquin Valley	7.5%	309	369	-	369
San Diego County	10%	413	1,417	-	1,417
Total	60% of 6,875 OR 4,125	6,875	6,879	-	6,909

Make Readies	% of stubs	Build Obligation	Completed	Remaining
Workplace	15%	1031	3154	-
Public Interest	10%	688	777	-

Completed Make Readies as of the Reporting Date are listed in [Appendix B](#).

Distribution of Make-Readies by CalEnviroScreen Criteria

NRG and EVgo have had some success in reaching disadvantaged communities with the build-out of Make Readies. For information purposes, CPUC staff requested an analysis of distribution based on the CalEnviroScreen (CES) standard, which did not exist at the time the Settlement was executed. The distribution is reported in the table below.

Region	CES Qualified Sites			Percent of total sites			CES Qualified Stubs			Percent of total stubs		
	MDU	WP	All	MDU	WP	All	MDU	WP	All	MDU	WP	All
LA	48	40	89	33.1%	22.9%	26.9%	266	308	578	26.2%	21.2%	22.7%
SD	14	12	27	19.2%	18.5%	17.1%	133	111	252	20.5%	19.4%	17.8%
SF	7	21	38	5.7%	22.1%	13.9%	73	218	366	5.8%	26.0%	14.4%
SJV	0	15	16	0.0%	46.9%	41.0%	0	142	152	0.0%	48.5%	41.2%
Total	69	88	170	20.1%	24.0%	21.2%	472	779	1348	16.0%	24.7%	19.6%

Another way to consider Make-Readies distribution to disadvantaged communities or residents is to consider the percentage of multi-dwelling unit (MDU) properties (and stubs) that have deed-restricted housing units. By this standard, the results benefit disadvantage communities at 31.1% of total operational MDU stubs. This is due in part to inclusionary housing requirements in many California communities, where mixed-income housing in single properties is a norm.

	Deed Restricted Sites	Percent of Total Operational MDU Sites	Deed Restricted Stubs	Percent of Total Operational MDU Stubs
LA	78	53.8%	523	51.6%
SD	17	23.6%	117	18.6%
SF	21	17.1%	270	21.6%
SJV	0	0.0%	0	0.0%
CA - All	116	33.8%	910	31.1%

Pursuant to Section 4(b)(vi)(B) of the Settlement, EVgo has established a website which identifies each installed Make-Ready Array's location and Start-Up Period expiration date. See <http://www.evgo.com/california-rev-progress/>.

USAGE DATA

In the Reporting Period, EVgo customers completed 300,526 fast-charging sessions at sites built under the Settlement (Freedom Station, HPC Plazas and EV Opportunity) and dispensed over 4,463,000 kilowatt-hours of electricity.

This translates to 14.47 million miles electric miles driven in this quarter alone, displacing 695,609 gallons of gasoline (assuming 3.125 miles per kWh and 24.3 mpg).⁶ Accordingly, EVgo sites accounted for 3,285 metric tons of avoided CO₂ emissions.

Confidential Appendix C, session data, will be submitted to the CPUC separately in electronic format.

⁶ 3.125 mi/kWh derived by AFDC from sales weighted average of 2016 model year vehicles with sales in 2015: 2015 sales from "U.S. Plug-in Electric Vehicle Sales by Model" (<http://www.afdc.energy.gov/data/vehicles.html>); MPGs based on 24.3 MPG CAFÉ Standard (http://www.afdc.energy.gov/vehicles/electric_emissions_sources.html).

EV OPPORTUNITY PROJECTS

The EV Opportunity Program under the Settlement consists of \$4 million toward “...Enhancing the appreciation of the social benefits of electric vehicles and creating opportunities for residents of underserved communities to benefit from expanded use of electric vehicles.” More specifically, the EV Opportunity Program Amount may be used to fund: a) the deployment of electric vehicle charging infrastructure to support electric vehicle car-sharing projects, in particular in low-income areas within the State of California; b) an EV job training program; and c) other projects consistent with the objectives of Section 4(d)(ii) of the Settlement.

The two approved Opportunity Programs, Green Raiteros, and Equal Access Charging Hub (EACH), were established in 2017. Summaries of these programs, progress to date, and ongoing project schedules are included herein.

Green Raiteros

Project Background

The Green Raiteros Pilot Project is being executed in partnership with the San Joaquin Valley Latino Equity Advocacy & Policy Institute (the LEAP Institute), the Fresno County Rural Transit Authority (FCRTA), and the Shared Use Mobility Center (SUMC). The Green Raiteros Pilot builds on an existing grassroots ridesharing program comprised of retired Valley farmworkers—the *Raiteros*—who offer rides for community members without access to transportation to and from work, medical appointments, or other needs. Green Raiteros expands access to carbon-free mobility—and given limited public transportation, sometimes any mobility at all—in the Central Valley by strategically and sustainably introducing EVs to the Raiteros’ services.

Q2 2019 Activities

Administrative:

Strategic planning for organizational and operational processes evolved in Q2 2019 with Green Raiteros making the transition to a self-sustaining organization. A program manual and a Green Raiteros Volunteer Driver Handbook have been developed. Key advisory members continue to work closely with staff to develop funding models for volunteer transportation programs that provide non-emergency medical transport. This will be key to securing contracts with clinics and other health care providers and rapidly increasing the volume of billable rides moving forward.

Staffing:

In this quarter, Green Raiteros continued to increase and improve staffing. The team continues to define new processes and to plan for 3, 5, and 10-year organizational outlook goals.

The current staff consists of:

- Executive Director - Responsible for Strategic partnerships & Development, and Outreach

- Executive Administrative Assistant - Responsible for Administrative duties, Logistics, Outreach and
- Dispatch Transportation Coordinator - Responsible for On-boarding Drivers, Outreach, Dispatch

Operations:

With two electric vehicles active in the *Raiteros* network, operations staff continue to recruit drivers and educate prospective drivers and the broader community on electric vehicle technology. Staff have attended over a dozen community events, public hearings and community engagements to advance awareness of the GR program. Including ongoing partnerships with volunteer feeder programs like Lideres Campesinas, an all-women organization that advance women’s leadership and support.

Accomplishments

- Green Raiteros Volunteer Driver application & training scheduled
- Volunteer Driver Trainings Sessions
- Onboarded (11) new volunteer drivers
- Client Medical Trips –
 - April provided (21) 2 leg rides, a total of 1,734 miles
 - May provided (23) 2 leg rides, a total of 2,386 miles
 - June Provided (18)2 leg rides, a total of 1,628 miles
 - 62 total completed trips and more scheduled
- Client list has over 55 community members
- Medical Trip distribution: Hanford (23), Fresno (29), Bakersfield (2), Lemoore (6) Madera (2)
- Clinic Research - Operations staff continues to compile spreadsheets of facilities from trip database and existing GIS inventories across the GR service counties (Fresno, Kings, Tulare) in order to begin establishing contract relationships.

Month, 2018-19	Fresno	Hanford	Bakersfield	Madera	Lemoore
November	3	5			
December	2	4	1	1	
January	7	6	0	0	2
February	8	7	1	1	2
March	10	7	1	1	2
April	8	6	4	1	2
May	8	8	4	1	2
June	7	5	4	1	1
Totals	53	48	15	6	11

Scheduling and Training Tools:

SNAP, the driver scheduling software, now allows dispatch to collect rides and upload into the SNAP database directly (in addition to drivers adding trips manually) allowing drivers to have a download of their daily trips appear directly on their app every morning. The additional customizations that have been added to SNAP are Spanish translation and Safety Checklist. The latter upon opening will prompt the driver to go through a “safety checklist” for their vehicle asking them to check tires, brakes, headlights/taillights, windshield wipers, seatbelts, and confirm first aid kit on board. SNAP software support has been continuously responsive to the GR Ops team - helping to set up the software on Samsung Galaxy tablets that drivers have in the vehicle and making sure administrators have seamless access to the back-end web portal for ongoing database maintenance. SNAP has also offered additional training on their 2.0 version which will be available in June 2019. GR is still evaluating full development of SNAP as it is limited to only Android enabled devices, and not all drivers are comfortable with the interface.

Electric Vehicle Charging:

The newly opened Romualdo M. & Imelda C. Leon Community and Mobility Center has (10) installed operational Level 2 Electric Vehicle Charging stations open to the local Huron community and the EV driving public with extended office hours in downtown Huron, CA. Completion of the overhead PG&E connection occurred in Q2. EVgo has also installed (2) fast chargers in downtown Fresno that are awaiting final inspection with the City of Fresno and PGE interconnection. A ribbon cutting and community event will highlight the increased access to charging in the Central Valley later this summer.

Construction Activity:

Prep for PG&E project – extended cement pad
PG&E Breaker Project – Completed on May 17, 2019
New street work in front of shop completed
Conference Room with Teleconference system

Outreach:

The Outreach Coordinator has been active in Q2 distributing fliers around Huron and surrounding Communities and having a presence at the various organizations listed.

- **Farmers Markets:**
The season for farmers markets rolls out (May- Oct), and the team has identified the local farmer markets in the surrounding areas of Huron, Avenal, Coalinga, Lemoore, and Hanford to plan to set up a booth. The Green Raiteros Transportation Coordinator has used Q2 to develop a stronger social media presence and will continue to roll out new campaigns based on older one that have been effective targeting the community of future drivers and riders.
- **Farm Worker Appreciation Day:**
A booth was staffed at the Farm Worker Appreciation Day to recruit new driver and educate the community regarding electric vehicles.
- **Community Service/Volunteers:**
Through constant advertising for Volunteer Drivers, Green Raiteros has developed in Q2 a great group on non-driver volunteers that volunteer their time with office administrative tasks, community clean up, staffing at our outreach events, and with fundraising. Green Raiteros provides for the City of Huron, a location for Community Service hours to be performed providing general service in the maintenance of the fleet vehicles.
- **American Ambulance:**
Working with American Ambulance to provide CPR/First Aid Training as community outreach at no cost to Green Raiteros.
- **Moving California:**
Table set up for training, education and networking at the Air Resource Board Low Carbon Transportation Investment Resource Event showcasing programs serving disadvantaged communities and lower income households. Green Raiteros advertised the event in Spanish and English.

Millions of dollars are available from the California Air Resources Board's Low Carbon Transportation Investments for programs serving disadvantaged communities and lower-income households.

Please join us at this training, education, and networking event to:

- Learn about resources available to increase access to clean vehicles.
- Promote awareness and access to clean transportation opportunities.

For More Information

Evento organizado por la Comisión de Gobierno Local en colaboración con The LEAP Institute, con apoyo del Air Resources Board de California y el Strategic Growth Council.

Partnerships and Future Funding Opportunities:

Many of the original partnerships and organizational relationships such as CEERT and Shared Use Mobility Center focused on incubating the Green Raiteros program have naturally relinquished or phased out while new partnerships have emerged. Mobility Development Partners, Purepecha Construction, Fresno State College Office of Community and Economic Development and Turn Key Trips a software company focused on volunteer transportation trip scheduling and dispatch are a few of the examples of relationships focusing on scaling up the Green Raiteros operation.

Green Raiteros continues to cultivate funders and financial institutions such as The California Endowment, Beneficial State Bank Foundation, The 11th Hour Project and San Joaquin Valley Air Resource Board to continue advancement of EV uptake and clean shared mobility networks. The Green Raiteros advisory group is focused on providing advice on the start-up tasks for the organization such as coordinating the service with other existing transit options and building relationships with clinics, medical facilities and other service related business and relationship development to continue to set Green Raiteros on a path to scale up to close gaps and add value to existing service providers through contracting and service agreements.

The Executive Director worked in Q2 to secure future funding opportunities with various local entities:

- **HealthNet:**
In development on a 3 -year grant to transport CalViva Clients to their medical appointments
- **Fresno County DPH:**
An idea that came to life in Q1 Advisory Committee meeting has developed into working on a pilot program with the Fresno County Department of Public Health to transport their TB patients to their appointment for testing. GR has created all the necessary project forms and developed the Driver Training program required for the Department of Public Health pilot.

- Kings County Human Services Agency:
Working with the KCHSA on a pilot program to transport their Welfare to Work Clients to their interviews and appointments.
- Centro la Familia:
Working with Centro la Familia to transport their clients to medical appointments.
- Misc. Ride Services:
The large amount of Medical Appointment Rides GR has performed has assisted in GR developing relationships with a new group of riders: the individual riding along to assist the client on their medical appointments in the surrounding communities. GR has been able to assist the ride along clients with non-medical appointments at city, county and federal offices of immigration, social security, workers compensation & social services. This has been a great additional offering to GR array of services to be able to assist the members of the community to address sensitive issues that help with their quality of life.

Green Raiteros has been instrumental in educating Huron community and surrounding rural communities regarding the Clean Vehicle Assistance Program, Beneficial State Bank (BSB) Foundation's electric vehicle financing program whose goal is a path to EV ownership. The program has been so successful it is working on a securing a 2nd round of funding to disperse in late 2019.

Green Raiteros will continue to cultivate its relationship with ITS-Davis, as ITS-Davis expressed a need to partner with a community-based organization that can serve as an important conduit for components of their research activities, like outreach and surveys, about EVs and EV technology in a disadvantaged community. The LEAP Institute is in a great position to leverage existing resources to take the lead and achieve success and notoriety with such an effort. The Office of Community and Economic Development (OCED) at Fresno State University has elevated the marketing reach of the Green Raiteros program. OCED will contribute to the marketing project by coordinating the multi-cultural media outreach and marketing material development activities. A Green Raiteros Volunteer was interviewed by Women's Day Magazine in May 2019, and the Executive Director was interviewed by local newspaper organizations and continues to promote the benefits of transportation electrification in this and other communities.

Challenges:

The adaptive re-use of a building nearly 50 years old extended the general contractor’s efforts stabilizing the building, upgrading and in some case installing mechanical systems for the first time, retrofitting and upgrading electric service, conduit and wiring - all of which extended the project period by many months. Additional challenges related to PG&E scheduling for the new electric overhead service was finally resolved after many visits by staff, outside contractors and PG&E. Prospects for new sources of funding are on the horizon but take time to be qualified and awarded.

2019 Planned Activities

Green Raiteros in the remaining months of 2019 will continue to operate with the LEAP Institute leadership and the advisory committee to help oversee the Green Raiteros Program and its success to extend its range and reach and tripling of ridership and trained Raiteros drivers. New sources of funding for expansion in neighboring counties is still on the horizon. The Office of Community and Economic Development (OCED) at Fresno State University will continue to elevate the marketing reach of the Green Raiteros program by offering marketing assistance through Ad and PSA campaigns tailored to Spanish language radio and television in the Valley as well as in local circulars and publications in 2019.

EV Opportunity Program – Green Raiteros Pilot Conclusion:

GOALS

- Implement a pilot program of *Green Raiteros* to demonstrate the business case for all-electric rural ridesharing while exposing more residents of the Central Valley to the social benefits of electric vehicles.
 - This goal was achieved and completed.
- Build capacity in Central Valley organizations so they can begin to effectively access State-funding programs for clean transportation and expand electric mobility in rural areas.

- This goal has been achieved and is continuing to materialize with the new sources of funding available to rural central valley areas from Air Resource Board, CEC and others.

OBJECTIVES

- Implement best practices in clean-transportation and ridesharing industries to develop a systematic and sustainable model for growth.
 - 2019 Q2 was marked by organizational review and evaluation to set in place rural ride share best practices for the next phase of growth.
- Establish a charging hub based in Huron where the Green Raiteros can charge EVs, support Dispatcher Facilities, and Community Development.
 - This objective was achieved and is continuing to operate.
- Create outreach, education, and training programs for both rideshare users and community members to communicate the social benefits of electric mobility.
 - Training materials, an employee manual and community outreach material have been created and translated into Spanish to share the benefits of EV’s

EACH

Project Background

The focus of the Electric Access Charging Hub (EACH) project is to create EV access and job opportunities in underserved communities. EVgo is developing seven EV-charging hubs in disadvantaged communities of the San Francisco Bay Area, Los Angeles, and San Diego that will serve the general public as well as electric carshare and rideshare vehicles. The EACH project aims to support EV carsharing and ridesharing, provide publicly available EV fast charging, and spur the adoption of electric vehicles in neighborhoods disproportionately impacted by pollution.

Q2 2019 Activities

Construction Progress:

As of the Reporting Date, 7/5/2019, chargers have been installed at all EACH locations. EVgo has received electrical and building inspections on all but one location, currently awaiting delivery of its transformer from the utility, which is why it is still listed as in construction below.

Region	Required	Distribution	Construction	Waiting on Utility	Operational
LA	-	3		2	1
SD	-	1		1	
SF	-	3	1	1	1
Total	7	7	1	4	2

All completed EACH sites as of the Reporting Date are listed in Appendix A.

Marketing, Outreach, and Education:

In Q2, EVgo celebrated the groundbreaking for the City of Compton’s first DC fast charging station in the parking lot of the Soledad Center. EVgo was joined by Councilmember Tana McCoy, City Manager Cecil Rhambo, State Senator Steven Bradford, the property owner, SCE Utility Representative and other community members. Additionally, EVgo tabled an EV educational booth at the City of Compton’s Earth Day Beats & Eats Event that featured a free community electric vehicle ride and drive.

Soledad Center, 909 S. Central Avenue, Compton

In May, at a special ribbon cutting event at the Brookhurst Community Center, Anaheim Mayor Harry Sidhu joined EVgo’s CEO Cathy Zoi and a number of other local partners, to celebrate the public launch of EVgo’s “Equal Access Charging Hubs” (EACH) program, which promotes more sustainable communities through public education and expanded access to EV fast charging. The Brookhurst Community Center was the first EVgo EACH site to open publicly and includes a total of four 50 kW DC fast-chargers capable of delivering up to 90 miles of range in 30 minutes.

“Anaheim is excited to offer EVgo fast charging stations to our residents and visitors who own electric vehicles or are considering the purchase of one. These four stations add to the roughly 200 charging stations throughout Anaheim and further support our sustainability efforts.”

- Anaheim Mayor Harry Sidhu

“The EACH program is unique for putting advanced EV charging infrastructure within reach of underserved communities while also supporting the mobility options that improve access for those without cars. Shared and electric mobility can and should reinforce one another, and EACH is a great example of how this can work in practice.”

- Brian Holland, California Program Director, Shared Use Mobility Center (SUMC)

“The green economy should benefit all communities, not only some. That’s why we’re proud to partner with EVgo in their efforts to help make clean transportation available, affordable, and accessible to all, including communities of color.”

- Michelle Romero, National Director from Green For All

EVgo continued to work with the Citizen Group and community-based organizations to develop and plan the marketing and outreach component of the EACH program [Communities Charging for Change](#).

Community-based organization:

- Social Justice Learning Institute
- Groundwork San Diego
- STEAM the Streets
- Green For All

On June 22nd EVgo hosted an event in the City of Richmond with the STEAM the Streets. This community event featured an EV showcase, demonstration on how to use fast chargers, live performance by Griot B of Schoolyard Rap and by Nehemiah Vaughn of the [#FuelChange](#) campaign.

EVgo was joined by city and state officials to introduce the charging hubs in Richmond; including State Senator Nancy Skinner, Mayor Tom Butt, District Supervisor John Gioia, Transportation Demand and Sustainability Manager Denée Evans, Adam Gromis of Uber, and Executive Vice President of Business Development Julie Blunden.

City of Richmond Civic Center, 325 Civic Center Plaza

The event featured a theme of integrating Science, Technology, Engineering, Arts, and Math (STEAM) and brought together community resources, incentive programs and working in the field of shared and electric mobility, including: EVgo, Envoy There, BAAQMD Clean Cars for All, MCE, Richmond Promise and the City of Richmond.

On June 22nd EVgo also participated with Green For All at Anaheim's Green Expo. This event brought together an EV ride and drive by Plug in America and hosted dozens of organizations working in the field of sustainability in Anaheim. EVgo offered fast charging demonstrations and served to educate attendee's on EVs and the charging infrastructure in their community.

City of Anaheim Green Expo, Green For All pictured left, at the EVgo booth

Program Evaluation:

In 2018, EVgo contracted the Shared Use Mobility Center (SUMC) to conduct the program evaluation of EACH. The program evaluation will address factors such as customer awareness, community engagement, vehicles access, charging access, charging behavior, travel behavior, hub utilization and GHG/environmental impact. EVgo and SUMC continued to define key performance metrics and the research methodology. The EACH program can serve as a policy pilot as the shared economy and shared mobility continue to create trends that policy makers, community organizers and businesses are recognizing as having transformational change in neighborhoods. The program survey will be distributed in English and Spanish.

Carshare and Rideshare Partnerships:

While there are a number of electric carshare companies actively collaborate or partner with EVgo in aspects of their operations, formal ties linked to specific hubs remains misaligned with those business models. Maven Gig, WaiveCar and new entrants such as GIG Car Share and Envoy will all stand to benefit from the EACH locations in the LA Basin, San Diego and SF Bay area, however, there is still limited capacity by car sharing providers to expand markets outside current operations. Additionally, floating (GIG Car Share) or weekly rental models (Maven Gig and Waive Car) are the leading trend rather than dedicated, fast-charge capable, battery electric vehicle carshare.

The introduction of CARB's \$17 million award to fund Clean Mobility Options for Disadvantaged Communities (Clean Mobility Options) will further support communities seeking to diversify and expand electric carshare options in California. Communities with EACH hubs (4 x 50 kW DC fast chargers), Inglewood, Compton, Anaheim, Richmond (2 location), San Diego, San Leandro stand to further benefit from the Clean Mobility Options now that the critical piece of public fast charging will be opening throughout Q3 2019.

Through event planning and coordination with local community organizations, EVgo continues to highlight these hubs and bring together resources, incentive programs and organizations and businesses working in the field of shared and electric mobility; Including:

- Alerting fleet partners and drivers of the new (and larger) stations
- Inviting fleet partners and rideshare companies to EACH hub openings
- Connecting with other partners working in the mobility space, e.g. SUMC and Transform, MTC in their EV carshare pilot program.

2019 Q3 Activities

[Communities Charging for Change](#) marketing campaign led by Citizen Group was put into place and schedules for launching station openings, community events, and educational outreach at each specific site has been coordinated with stakeholders. The hub events and outreach are being scheduled in coordination with a hub's projected commissioning and energization date.

As of the Reporting Date, July 5, 2019, EVgo and community partners launched two events in support of two open EACH hubs (described above):

- City of Richmond Civic Center
- Brookhurst Community Center

TECHNOLOGY DEMONSTRATION PROGRAMS

Stationary Storage Plus Electric Charging (SSPEC)

Project Background

The Stationary Storage Plus Electric Charging (SSPEC) project uses stationary batteries in a technology demonstration application to reduce the cost of operating DC fast chargers (Level 3) and alleviate strain on the grid.

The SSPEC project has successfully:

1. Deployed a test site with microgrid components, including battery storage, solar generation, EV charging infrastructure, and site control technology
2. Tested various configurations of distributed energy resources and electric vehicle DC fast chargers
3. Analyzed results from operation of the SSPEC site and historical data from EVgo's charging station network to identify load profiles, potential sites, and utility territories which can benefit most from stationary storage and/or generation on site

For further details, see confidential [Appendix D-1](#).

EV Storage Accelerator (EVSA)

Project Summary

The EV Storage Accelerator (EVSA) aims to demonstrate vehicle-to-grid (V2G) technology as a low-cost energy storage resource. The project used nine vehicles for the demonstration, three Honda Accord Plug-in Hybrid electric vehicles (PHEVs) and six Nissan LEAF battery electric vehicles (BEVs). The four primary goals of EVSA are to:

- Create a test environment for two major automakers, Nissan and Honda, to gain experience with V2G technologies and prepare them for a further commitment to the technology
- Advance product readiness for bidirectional inverters, including listing standards and product certification
- Identify use cases for V2G and test vehicles against those use cases
- Inform public policy around the system, ratepayer, and customer benefits of V2G

Q2 2019 Activities

Use Cases: The EVSA Project Team has completed two of the four outlined project use cases.

Use Case #3, Emergency Power Back-Up: The Project Team implemented the on-site test at UCSD with the support of contractor Baker Electric. The test was to discharge one 2016 Nissan LEAF with a 30 kWh via a grid-islanded Princeton Power CA-10 connected to a load bank. The

discharge started at 8:28 am with a LEAF that had a 100% state of charge (SOC) and lasted until 10:30 am when the vehicle reached a <5% SOC. The Project Team discontinued the discharge cycle in an effort to not put undue stress on the vehicle battery. Please find pictures from the test in **Appendix B** in the full report. The Project team is still analyzing the data collected and provided by Baker Electric. A full analysis, including the cost-benefit analysis conducted by UCSD, will be included in the final project deliverables.

Use Case #4, Value of V2G: The Project Team submitted to the CPUC both the (1) *Interim Data Analysis Report Module* and (2) *Interim Report on Simulated Revenue from V2G*. The team also presented the results of both reports in the *Interim Project Benefits Update* during the Q2 2019 stakeholder update call held on May 10th. The results presented were met with positive feedback from CAISO – a key stakeholder. The operations of the project and dispatch of vehicles continued through Q2 to continue collect data to be used for a full year of analysis and revenue valuation by the E3 team for the project final deliverables.

Deliverables: The Project Team submitted the following deliverables in confidential Appendix D-2 of the Q2 2019 quarterly report. The following deliverables are due to the CPUC and stakeholders in Q3 2019 following the completion of Q2 2019 data collection:

- Final Data Analysis Report Module
- Final Project Report to the CPUC
- Final Project Fact Sheet
- Final Public Facing Presentation Slides
- Final V2G Action Plan

For further details, see confidential [Appendix D-2](#).

Extreme High Power DC Charging Station

Project Background

Automakers are continuing to increase range of EVs by increasing battery capacities, battery capacities, as evidenced by the late-2016 release of the all-electric Chevy Bolt with 238 miles of range and additional price competitive longer-range vehicles like the Nissan LEAF, Hyundai Kona, and others. To maintain a consistent customer / EV driver experience regarding charge duration and SOC (State of Charge) completion percentage, DC EVSE infrastructure may need to increase the power level of charging infrastructure (i.e. increase the rate at which energy is delivered into the electric vehicle battery).

This project is intended to bring auto OEMs, EVSE, and cable manufacturers together to demonstrate and facilitate testing and development of standards and equipment. The project will do the following:

- Deploy first of its kind electric vehicle supply equipment (EVSE) infrastructure capable of high-power DC charging (300+ amps).
- Test with auto original equipment manufacturers (OEMs) and EVSE providers to allow for test bed and development of standards.

Q2 2019 Activities

EVgo's high-power charging station in Baker, CA became fully operational in Q4 2018 with (2) ABB 50 kW chargers, (2) BTC 150 kW chargers, (1) ABB 175 kW charger, and (1) ABB 350 kW charger. Since the station has been operational EVgo has been monitoring the usage and operation of the high-power chargers at the site and has seen cars charging above 50 kW in Q2 2019.

Since the beginning of the high-power technology demonstration project in 2015 electric vehicles have continued to be released onto the market with longer range and capable of higher power DC charging levels. 50 kW is now the minimum for DC fast charging and most new electric vehicles are now capable of rates above 50 kW. While EVgo still sees 50kW as an appropriate use-case for many locations such as retail where customer dwell times average 30 minutes or more, we are exploring standards for future proofing for higher power to plan for the future EV models with higher battery range.

Image 1: Electric vehicle models shown relative to their max DC charging rates.

While few vehicles may charge at stations over 50kW, EVgo is installing high power as part of these technology demonstration projects and exploring future proofing for its operations.

In addition to the high-power chargers open to the public in Baker, EVgo is installing an additional 175 kW high-power charger in Fremont for public use. The site in Fremont to date has the original high-power prototype charger from ABB installed and will be swapped for a production high-power charger that will then be open for public charging.

Image 2: ABB prototype high-power charger in Fremont, CA.

On May 3, 2019 members of the EVgo engineering team along with 2 engineers from Hyundai-Kia team drove the new Hyundai-Kia electric vehicle (EV) models (2019 Hyundai Kona, 2019 Kia Niro, and 2020 Kia Soul EV) to the high-power charging station to gather data on charge curves. The new Hyundai-Kia vehicles are all built off of the same battery platform and contain a 64 kWh battery pack which provides the vehicles an approximately 240 mile range (slight variation between models).

For further details, see confidential [Appendix D-3](#).

EVgo will continue controlled charger and vehicle testing now that the technology demonstration high-power charging stations are fully operational. The goal of testing will be to determine the charge curves of different commercially available electric vehicle models on chargers of different power levels. The information on charge curves and charge times when combined with cost of different charger power levels will help inform policy makers and commercial partners on the costs and benefits of deploying different charger power levels.

EVgo plans to gather more charger/vehicle combination data sets to perform further analysis and inform recommendations to industry stakeholders. EVgo will continue testing commercially available vehicles on high-power chargers and will submit a full High-Power DC Charging Technology Demonstration Report by end of Q3 2019 in accordance with technology demonstration project reporting requirements.

EVgo would like to thank the CPUC and project partners ABB, BTC, BMW, Hyundai-Kia, Princeton Power Systems, ChargePoint, and MaxGen Energy Services for their continued technology demonstration project support. EVgo's Baker charging station with a variety of charging levels offers the perfect real-world test site for EV driver enthusiasts and OEM partners to test their vehicles high-power charging capabilities. This site was featured in the [NY Times](#) in a recent article surveying the state of the charging landscape in California.

Appendix A

Freedom Station Table

See attached.

APPENDIX A - Freedom Station Detail
Dated as of: March 5, 2019

<u>Name</u>	<u>Street Address</u>	<u>City</u>	<u>Region</u>	<u>Operational Date</u>	<u>PUMA</u>	<u>Both SAE & CC</u>	<u>CES 2.0 SB 535 DAC</u>
