San Francisco, California 94102

**RE: Safety and Enforcement Division's Directive to Southern California Gas Company to conduct Internal Corrosion Threat Assessment on all Aliso Canyon's Injection and Withdrawal Pipelines**

Dear Ms. Malashenko:

The Aliso Canyon storage facility is critical to the reliability of natural gas and electricity service in Southern California, and SoCalGas remains committed to providing safe and reliable energy to the millions of Californians who rely on us each day. As directed in your September 20, 2016 letter to Mr. Jimmie Cho, SoCalGas conducted a root cause analysis of the pinhole leak discovered on the 8-inch line from Ward 3A and conducted an Internal Corrosion Threat Assessment on injection and withdrawal pipelines at the Aliso Canyon Storage Facility. The purpose of this letter is to provide you a copy of the final report of the root cause analysis prepared by Det Norske Veritas / Germanischer Lloyd (DNV/GL) and previously discussed in letters dated September 26, 2016 and October 17, 2016.

Please do not hesitate to contact me if you have any further questions or concerns regarding the pinhole leak in the withdrawal line at Ward 3A.

Sincerely,

Rodger R. Schwecke  
Vice President, Gas Transmission and Storage
